

Company/University Profile Information

Organization	Decision Dynamics, Inc.
Background of Organization	Decision Dynamics, Inc. (DDI) is creating and applying a unique set of state-of-the-art decision support tools that provide project planners, program managers and policy makers with the ability to quickly analyze the consequences of multiple “what-if?” scenarios. In doing so, these tools quantify the impacts for any mix of management policies, resource constraints and mission requirements for major weapons systems. DDI’s software models provide the next step in management support analysis tools by combining the principles of traditional project management methods with the unique features of the system dynamics simulation methodology. The resulting sets of models simulate the dynamic behavior over the life cycle of a program, from design and engineering, into production, through operations and support.
Address	Decision Dynamics, Inc. 11680 Doolittle Drive, Suite 114 Waldorf, MD 20602 Phone: (301) 638-1800 www.decisiondynamics.com
Type of SD Work	We provide a variety of products and services, tailored to meet the needs of the client in the most cost-efficient manner. Our product list includes: <ul style="list-style-type: none"> - Affordable leasing, multi-year, and multi-seat license structures for WorkFlow and FleetSight; - Targeted on-site client training; - Focused consulting support for advanced applications.
Where SD fits in your organization	The SD component of our company is small and focused on the modelling changes required during software interface and capability improvements.
