

Job Profile Information

Organization	ITA Software, Inc.
Background of organization	ITA Software provides airfare shopping and pricing services to the travel and airline industry. Founded by MIT Computer Science graduates, it is a successful, growing company full of smart, dynamic people.
Address	141 Portland St., 7th floor Cambridge, MA 02139
Contact person	John Olson
Contact phone, fax and/or email	johnno@itasoftware.com
Position title	Computer Scientist/Programmer, Performance Analysis
Job location	Cambridge, MA
Position description	Our airfare pricing and shopping system runs on a distributed network of Linux servers, answering thousands of queries an hour. In order to maximize performance, we need to measure and understand every part of this system from the hardware up. We're looking for people with system dynamics knowledge and experience to complement our software and hardware knowledge and help us improve our end-to-end performance.
Required skills	Experience in performance analysis of complex systems. Facility with statistical analysis of data. Able to write maintainable, robust computer programs for data analysis. Excellent communication skills. Detail oriented and responsible.
Desired Skills	Software development experience and computer hardware experience. Linux/Unix configuration and administration.
Salary Range	N/A
